

coolsculpting® ELITE

SCULPT. CONTOUR. SHAPE.

COOLSCULPTING® FREEZES AND ELIMINATES TREATED FAT CELLS—PERMANENTLY.

*CoolSculpting is the treatment doctors use most for nonsurgical fat reduction in the US.

Kruz was treated with CoolSculpting® Elite on her abdomen. **Results and patient experience may vary.**

Uses

CoolSculpting® and **CoolSculpting® Elite** are FDA-cleared for the treatment of visible fat bulges in the submental (under the chin) and submandibular (under the jawline) areas, thigh, abdomen, and flank, along with bra fat, back fat, underneath the buttocks (also known as banana roll), and upper arm. It is also FDA-cleared to affect the appearance of lax tissue with submental area treatments. **CoolSculpting®** and **CoolSculpting® Elite** are not treatments for weight loss.

Please see additional Important Safety Information within.

SAY GOODBYE TO STUBBORN FAT FOR GOOD.

Losing stubborn body fat isn't easy. Fortunately, CoolSculpting® is a nonsurgical way to contour your body by freezing and eliminating treated fat cells.

It's permanent.

CoolSculpting uses cryolipolysis, otherwise known as fat freezing, to target and eliminate fat cells.

It's proven.

CoolSculpting has been FDA cleared for more than 13 years and its safety and effectiveness have been evaluated in clinical studies worldwide.

14M+ treatments performed
worldwide.

Little to no downtime.

Since CoolSculpting is noninvasive, patients are usually able to return to normal activities right after treatment.

Results in 2 visits.

Many patients may need 2+ treatment visits to reach their desired results.

Important Safety Information

These procedures are not for everyone. You should not be treated with **CoolSculpting®** or **CoolSculpting® Elite** if you suffer from cryoglobulinemia, cold agglutinin disease, or paroxysmal cold hemoglobinuria.

Please see additional Important Safety Information throughout.

89%

of patients would recommend to a friend after 2 visits.*,†

92%

of participants noted improvement in the fit of clothing over the treated area after 2 visits.*,†

TC Rose was treated with CoolSculpting® Elite on her abdomen.
Results and patient experience may vary.

*In a study, 96 patients received CoolSculpting® Elite treatments on the midsection (abdomen and flanks). 94 patients received two treatment visits and 2 patients received one treatment visit. The primary goal was to evaluate patient satisfaction captured by a survey.

†Additional goals of the study were captured by surveys.

GOODBYE STUBBORN FAT, HELLO CONTOUR!

BEFORE TREATMENT

BEFORE TREATMENT

AFTER | 12 WEEKS AFTER 2ND VISIT

Contouring the abdomen and flanks
(love handles) with 14 treatments over 2 visits.

AFTER | 8 WEEKS AFTER 2ND VISIT

Contouring the flanks (love handles)
with 8 treatments over 2 visits.

Important Safety Information (continued)

Tell your doctor if you have any medical conditions including recent surgery, pre-existing hernia, and any known sensitivities or allergies.

Please see additional Important Safety Information throughout.

SHAPE AND SCULPT YOUR WAY TO RESULTS

BEFORE TREATMENT

BEFORE TREATMENT

Bottom before-and-after photos courtesy of Bodify and Steven Sorr, NMD.

Results and patient experience may vary.

Your provider may recommend your second treatment visit occur 6 to 8 weeks after your first treatment visit.

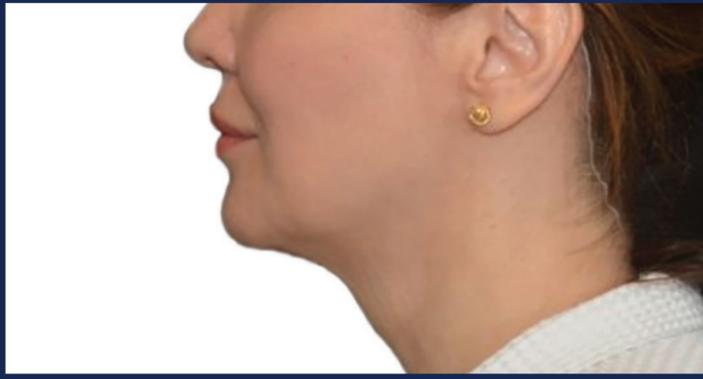

REAL OUTCOMES WITH A 2-VISIT TREATMENT PLAN

AFTER | 16 WEEKS AFTER 2ND VISIT

Contouring the upper arms with 4 treatments over 2 visits.

AFTER | 8 WEEKS AFTER 2ND VISIT

Contouring under the chin with 4 treatments over 2 visits.

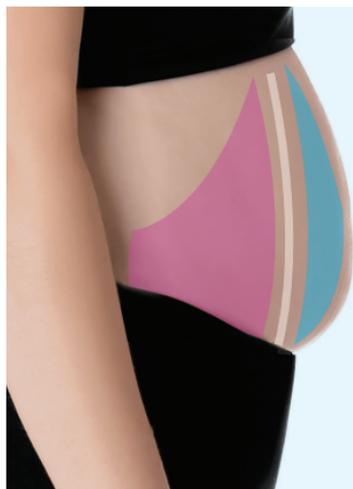

Important Safety Information (continued)

During the procedure you may experience sensations of pulling, tugging, mild pinching, intense cold, tingling, stinging, aching, and cramping at the treatment site. These sensations lessen as the area becomes numb.

Please see additional Important Safety Information throughout.

TARGET PINCHABLE FAT

CoolSculpting® reduces stubborn (subcutaneous) fat that is resistant to diet and exercise.

Subcutaneous Fat
Pinchable fat found beneath the skin.
Can be treated with CoolSculpting.

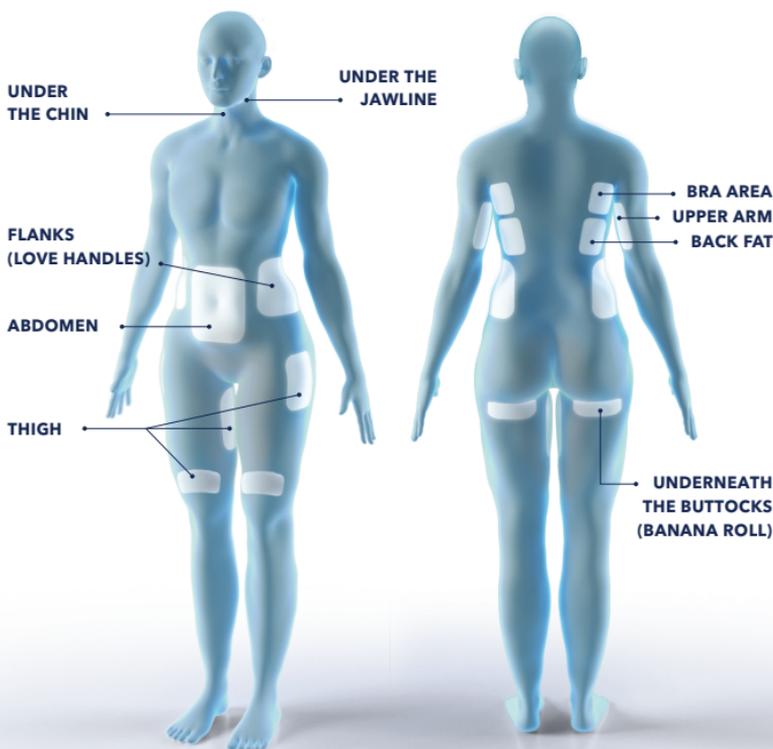

Abdominal Wall
Muscle and tissues that separate visceral and subcutaneous fat.

Visceral Fat
Found beneath the abdominal wall and surrounds internal organs. CoolSculpting is not indicated for visceral fat.

Image does not reflect actual results.

WORKS IN THE AREAS THAT BOTHER YOU MOST

The only treatment FDA cleared to treat fat in 9 different areas of the body

FROM STUBBORN FAT TO SCULPTED RESULTS

STUBBORN FAT

Many people have stubborn fat despite diet and exercise.

FAT CELLS FROZEN

Controlled cooling gently and effectively targets fat cells underneath the skin while leaving the skin and surrounding tissue unaffected. Treated fat cells are frozen and then die.

FAT CELLS ELIMINATED

In the weeks to months that follow, the body naturally processes the treated fat and eliminates these dead cells.

GONE FOR GOOD

After CoolSculpting treatment, eliminated cells are gone for good.

Important Safety Information (continued)

Following the procedure, typical side effects include temporary redness, swelling, blanching, bruising, firmness, tingling, stinging, tenderness, cramping, aching, itching, or skin sensitivity, and sensation of fullness in the back of the throat after submental or submandibular area treatment.

Please see additional Important Safety Information throughout.

PERSONALIZED FOR DIFFERENT CURVES AND BODY SHAPES

Prior to treatment, your provider will give you a full-body assessment and recommend a personalized treatment plan designed to help you achieve your goals.

Only CoolSculpting® Elite

- Treats 2x the stubborn fat and saves time with dual applicators
- Applicators are better shaped to fit your natural curves
- Designed for comfort, the Elite applicator cup increases instances of tissue contact by 47%*

The clinical significance of these data has not been established.

SCHEDULE YOUR CONSULTATION TODAY

*In an engineering study evaluating the fit and comfort of CoolSculpting® Elite and CoolAdvantage™ applicator cups, 41 patients underwent a total of 665 tissue draws. Fit was determined by clinician-reported results on tissue contact and vacuum seal. Dry applicator cup test was performed during which cups were applied in equivalent manner and for approximately 12 seconds (vacuum-only setting 80). Based on clinician ratings, 96.6% of 204 tissue draws with the Elite applicator geometry resulted in acceptable tissue contact versus 65.7% of 99 tissue draws with the CoolAdvantage™ applicator. Tissue draws were evaluated with clear-cup prototypes.

Important Safety Information (continued)

Rare side effects may happen in 1 to 10 out of 10,000 CoolSculpting® and CoolSculpting® Elite treatments (between 0.01% to 0.1%). One such rare side effect is a visible enlargement in the treated area, which may develop 2 to 5 months after treatment, will not resolve on its own, and may require surgical intervention for correction.
